## OUR LOCATION

"Rothesay" 1329 Berthong Rd YOUNG NSW 2594

## FOREWORD

It is with great pleasure that we present the 2024 line up of sale rams and we thank you for supporting our sale.

Welcome to "Rothesay" and the Southern arm of the North South Border Leicester Stud. For those of you who are unable to make it to "Rothesay" on sale day, we have you covered.

Our 2024 Southern Sale will not be facilitated by AuctionsPlus. We will have agents available via mobile phone to bid on your behalf if you cannot make the sale on the day. We are happy to provide you with short video footage of selected rams on request. Alternatively, pre-sale inspections can be arranged by appointment.

All our rams are offered with LambPlan ASBV's and to help take the work out of your selection process we have listed our sale rams on sheep genetics RamSelect. This information is available now and on sale day.

The 2024 sale team is an impressive even line and all rams come with the verified North South QA Mark. Remember if you need help selecting rams just ask one of our team.

Whether you are buying rams or just a spectator everyone is welcome. Sale day is a great time to catch up with friends so please be sure and join us for a BBQ Lamb Steak Sandwich and a cup of tea or cool drink.

**The Makeham Family**

## HISTORY

The Makeham Family began breeding Border Leicester Sheep in 1957 when Jeffery Makeham purchased 4 ewes from Yarrison Stud and a New Zealand bred ram from Harakeke Stud. The Stud was registered under the prefix of Taringa Downs No. 2773. Additional stud ewes were purchased from Terreppee and a stud ram "Crymelon Roman" was purchased from Crymelon. Taringa Downs was located on the family property at Walcha in Northern NSW and the stud recorded a successful Show and Sale record until a near complete dispersal to Chandivan stud due to drought conditions in the 1980's.

The Stud was re-registered as North-South in 2006 and is now located at "Rothesay" in the Young/Wallendbeen district of NSW.

North-South continues to record good sales of both stud and flock rams to local and interstate buyers. The Stud continues a keen interest in showing locally and at Major Sheep shows enjoying their share of ribbons while promoting a quality true-to-type modern Border Leicester sheep.

## HEALTH STATUS

North-South is dedicated to maintaining rigorous health requirements to ensure the sheep we deliver to our clients have a second to none health assurance. We are OJD MN3 vaccinated NS76283 with all sheep on the property vaccinated for the last 15 years. North-South is Brucellosis Accredited 76772 and Footrot Free.

## DELIVERY NUMBERS PERMITTING

Complementary delivery can be arranged to most areas. Please speak to us before the commencement of the sale if you need to make delivery arrangements. All rams purchased are to be delivered by 4:00 pm sale day unless alternative arrangements have been agreed prior to the sale. Vendor's responsibility for all Sale Rams pass to the successful purchaser on the fall of the hammer.

## ANIMAL PEDIGREES

All rams offered for sale have full pedigrees and these can be found by visiting our sale catalogue on the **Sheep Genetics website**:

behind will put  
you in front**

## Understanding LAMBPLAN Maternal ASBVs

We take the time to provide you with Lambplan Maternal ASBV's however it is important for you to understand that the breeding objective of Lambplan is different to that of North South. As a consequence of the different breeding objectives, individual trait weightings as a contribution to an index, for example BLX can result in North South having a lower index when compared to some other flocks.

**We urge you to use Lambplan information with caution and focus more on what you see in front of you (Phenotype) when selecting your rams. Phenotype is the detectible expression of a ram's genotype. In our opinion, if you select the ram you like, you will get the genotype you are looking for. We see far too many high index rams that lack important physical attributes that every breeder should be focused on.**

**BWT:** Birth Weight (kg) – Rams with more negative BWT ASBVs produce lambs which are lighter at birth. (BWT ASBVs estimate the genetic difference between animals in live weight at birth)

**PWT:** Post Weaning weight (kg) – Rams with more positive WT ASBVs produce progeny that grow quicker and are heavier at a certain age. WT ASBVs are reported at weaning (WWT), post weaning (PWT), yearling (YWT), hogget (HWT) and adult (AWT) ages. (WT ASBVs estimate the genetic difference between animals in live weight at a given age)

**PFAT:** Post Weaning Fat Depth (mm) – Rams with more negative FAT ASBVs produce progeny that are leaner. FAT is reported at post weaning (PFAT), yearling (YFAT) and hogget (HFAT) ages. (FAT ASBVs estimates the genetic difference between animals in GR fat depth)

**PEMD:** Post Weaning Eye Muscle Depth (mm) – Rams with more positive ASBVs for EMD will produce progeny that have more muscle, independent of weight, and a higher lean meat yield. EMD is reported at post weaning (PEMD), yearling (YEMD) and hogget (HEMD) ages. (EMD ASBVs estimate the genetic difference between animals in eye muscle depth at the C site)

**WR:** Rams with more positive WR ASBVs will sire daughters that wean a higher percentage of lambs. (WR ASBVs estimate the genetic difference between female progeny of a sire for the number of lambs present at weaning)

**BLX:** Border Leicester Cross Index – The BLX index is for a first cross operation where maternal sires are joined to Merino dams, with the first cross female offspring then used in prime lamb systems joined to terminal sire rams.

The index favours high early growth animals with good reproduction.

**Acc:** Expressed as a % – Relates to the amount and quality of information available to calculate an ASBV.
